PROJECTS

AWS Photos - Serverless Photo Management Application

Technologies: AWS Cognito, IAM, Amazon S3, Docker, GitHub Actions, JavaScript, HTML, CSS

- Developed a serverless photo management application with secure user registration, email verification, authentication, photo upload, download, and deletion using AWS Cognito and Amazon S3.
- Implemented Cognito User Pools, Identity Pools, and IAM roles to provide secure access to AWS resources using temporary credentials and JWT-based authentication.
- Deployed the application on GitHub Pages and gained hands-on experience in AWS authentication, IAM permissions, S3 storage management, and cloud security best practices. [Github](#)

AWS S3 Static Website – CI/CD Deployment

- **Technologies:** HTML, CSS, JavaScript, Git, GitHub, GitHub Actions, AWS S3, AWS IAM
- Developed and deployed a responsive static website hosted on Amazon S3.
- Implemented a **CI/CD pipeline using GitHub Actions** to automatically synchronize website changes from the GitHub repository to the S3 bucket.
- Automated deployment on every push to the **main branch**, reducing manual deployment effort and improving release consistency.
